## ULTRAFLEX fully-drained farrowing pen

## Innovative solutions for the future...

The combination of plastic and cast iron provides a pleasant environment for both sows and piglets. The system is incredibly flexible, thanks to its modular design, and practically any requirement can be met as heat pads and plastic and cast iron elements can be combined at will.

Optimum manure fall-through is ensured by the correct size of aperture between slats.

Combinations of different materials give optimum conditions.

Ikadan ULTRAFLEX has been developed to ensure:

- Non-slip safety
- Minimum injury
- Optimum manure fall-through
- Correct temperature
- Easy cleaning
- Extreme durability
- A fully-slatted floor that gives optimum manure fall-through and easy cleaning.

Cast iron and plastic provides different temperatures for sows and piglets.
