

# Smart-Fastener

Patent pending

Ikadan Smart-Fastener makes it easy to attach penning and equipment to plastic and concrete slatted floors.

The Ikadan Smart-Fastener  
for plastic flooring

Ikadan Smart-Fastener consists of a stainless steel nut embedded inside strong plastic. Bolts and washers are also included.

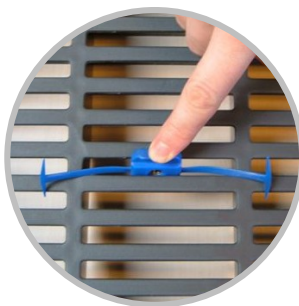

The Ikadan Smart-Fastener  
for concrete flooring

Smart-Fastener for plastic flooring requires a 10 mm slot opening and the one for concrete flooring requires a 16 mm slot opening.

Ikadan Smart-Fastener is installed from the top surface.

The wings keep the Smart-Fastener within reach until the bolt has been placed in the nut.

Once fastened, the trails on the Smart-Fastener keep it locked. You can then cut off the wings.
